PERSONAL INTEREST

I am interested of everything about design, graphic, typography and photography.
First of all I am enthusiast of what makes possible communicate a thought or an ideal. As a graphic designer, I consider essential to 'hunt' everything around me; the first aim of a designer is, in my opinion, the discovery of the solution of a problem: someone who can't spot the problem can't therefore solve it. Besides the closer matters to my vocation, I am interested in politics, history, economy, cinema, literature and painting. They represent shades of my profession.
